ABSTRACT

This booklet provides graphs, tables, and a summary compiled from data collected in schools using the 1995-1996 PRIDE Questionnaire. The data reflect prevalence and patterns of drug and alcohol abuse, violence, gang activity, and suicide. This report is designed for educators to use within their drug abuse and violence awareness and prevention programs with faculty, students, and parents. This report is divided into four chapters. Chapter One, Introduction, contains a news release about results of the Pride Survey. Chapter 2, Summary Statistics, includes five figures that summarize some of the student information questions in regards to drug use. These data were gathered by examining specific subsets of the youth population. Chapter 3, Standard Graphs, includes 26 graphs that explain the relationship between student behavior and alcohol/drug use. The location and time of drug use graphs help with understanding the need for a commitment to drug abuse prevention by parents and the larger community. They show that student alcohol and other drug use occurs most often outside the school and at times when school is not in session. The Perceived Harm of alcohol and other drugs graphs assist with understanding how false assumptions concerning harm are related to drug use. When drugs are perceived as harmless, the probability of use increases. The availability graphs show that easy access to drugs increases the probability of use and that availability increases at higher grade levels. Chapter 4, Percentage Tables, contains 135 tables. Each table corresponds to an item on the questionnaire. Data is presented by grade level. (MKA)

CHAPTER 1

INTRODUCTION

The following graphs, summary and tables are compiled from data collected in your school(s) using the **PRIDE Questionnaire**. These data reflect prevalence and patterns of drug and alcohol use, violence, gang activity and suicide. It is important that this report be utilized as part of your drug abuse and violence awareness and prevention programs. We strongly suggest that you:

- **COPY THE FOLLOWING PAGES,** (which highlight and graphically summarize drug use and violent behavior by students in your school)
- **DISTRIBUTE THEM TO YOUR FACULTY**
- **AND SHARE THIS INFORMATION WITH PARENTS.**

Most of all, we strongly encourage a parent meeting at your school to share this information!

NOTE: Drug use occurs more often in the home than at school. Most drug use occurs on weekends when school is not in session. You will find statistics in this report which support these findings.

FOR GREATEST SUCCESS IN DECREASING DRUG USE, FACULTY, STUDENTS AND PARENTS MUST WORK TOGETHER TOWARD A DRUG-FREE LIFESTYLE.

If you have questions about this report or if you wish to have information on other **PRIDE** services and products, please call the **PRIDE** Office or write to the following address:

Student use of most drugs reaches highest level in nine years

More report getting "very high, bombed, or stoned"

Washington, Sept. 25 – More than one in four high school seniors (26.5%) used an illicit drug once a month or more often during the past school year, and when they used drugs they got more intoxicated than ever.

- Nearly one in five 12th graders (18.3%) used an illicit drug weekly or more.
- Almost one in ten (8.4%) used daily.
- More than a quarter admitted *weekly* alcohol use (25.8%). In addition, 7.1% used cocaine in the past year; 11.6% used uppers; 12.1% used hallucinogens, and 3.5% used heroin.

*First Year of PRIDE Survey National Summary

In its ninth annual survey of students in grades 6-12, PRIDE (National Parents' Resource Institute for Drug Education) reported that annual use of most drugs was at the highest level since the survey began in 1987-88. Record percentages of use were reported for the following drug categories: cigarettes, marijuana, cocaine, uppers, downers, inhalants, and hallucinogens.

Only three drug categories have ever shown higher levels of use in the PRIDE Survey: beer, wine coolers, and liquor. (Heroin was added as a drug category in 1995-96.)

Overall, for grades 6-12, PRIDE found that 29.5% of all students surveyed reported annual use of at least one illicit drug, compared with 18.6% in 1987-88, an increase of 58.6%.

% Any Illicit Drug Use by 6-12th Graders			
	1987-88	1995-96	% Chg.
Annual	18.6	29.5	+58.6
Monthly	10.6	18.3	+72.6
Weekly	6.6	12.5	+89.4
Daily	2.3	5.2	+126.1

Annual use of any illicit drug increased from 24.0% in 1994-95 to 29.5% 1995-96, a one-year increase of 22.9%.

On a monthly basis, use of any illicit drug by students in grades 6-12 rose from 10.6% in 1987-88 to 18.3% in 1995-96, an increase of 72.6%.

Fewer students than ever say parents warn them

Despite these alarming statistics, the percentage of students who said their parents talk to them often or a lot about the problems of alcohol and other drugs plunged to the lowest level in the six years that the question has appeared on the survey instrument (29.6% in 1995-96 vs. 40.3% in 1990-91, a drop of 26.6%).

Nor are students receiving drug warnings from their peers. Only 11.7% said their friends talk to them regularly about the problems of drugs, compared to 10.7% in 1990-91, a slight improvement.

By contrast, 88.9% said their teachers have taught them about drug dangers.

Who Warns Youth Often About Drugs - % - Grades 6-12	
Peers	11.7
Parents	29.6
Teachers	88.9

When parents warn their children about drugs, use is lower. For example, among students who said they never hear from their parents on the subject of drugs, 35.5% reported using an illicit drug in the past year. That number fell to 26.6% for those whose parents spoke "a lot."

Schools are least likely place of drug use

Compounding the problem that fewer parents talk to their children about drugs is the fact that most drug use occurs when and where parents are in charge.

Among five choices (home, friend's home, car, other place, and school), students said a school building is the last place they use drugs. For example, among 6-12th graders, 16.8% said they smoked marijuana at a friend's home, 13.9% said they smoked at some other place in the community; 10.3% said they smoked in a car; 8.2% said in their own home; and 4.2% said in school.

Students said they used drugs mostly at night and on weekends, again when parents are in charge.

MORE

"Students are getting more guidance about drugs from their teachers than from their parents and friends, and they are using drugs far more often at home, in cars, and at places in the community other than schools. School is the most drug-preventive, drug-free place in town," said Thomas J. Gleaton, president of PRIDE.

Where 6-12th Graders Smoke Marijuana - %

Other Place	13.9

When they use, students are getting higher than ever

Besides more students using drugs more frequently, more students in 1995-96 reported getting "very high, bombed, or stoned." When they used marijuana, nearly three-fourths of seniors (73.6%) said they get very high, versus 62.8% who responded the same way in 1987-88.

Users of beer, cocaine, uppers, inhalants, and hallucinogens also said they were getting higher today than nine years ago.

"This is not so-called 'recreational' use. This is marijuana, cocaine, heroin, LSD, and amphetamines. This is not experimentation. This is monthly, weekly, and daily use. This is a human tragedy," said Doug Hall, executive director of PRIDE.

% 12th Graders Getting "Very High"	1987-88	1995-96

Uppers	29.7	46.4
Inhalants	36.9	50.0

Today's report marks the fifth straight year of rising drug use reported by PRIDE. The PRIDE Survey has been reported annually since the 1987-88 school year.

The responses of 129,560 students in 26 states from New York to California were included in the survey, making it the largest student survey in the nation, and the first to report drug use for the 1995-96 school year.

Marijuana users deeply involved in other drugs

Among all students studied 29.5% said they used an illicit drug in the past year, and 24.8% said they smoked marijuana. However, most marijuana users in the study also drank alcohol, and used other dangerous drugs at very high rates

Among monthly marijuana users, 69% also drank liquor monthly versus 7.4% of non-marijuana users; 13% used cocaine monthly versus one-tenth of a percent of non-users; and 19% used hallucinogens monthly versus two-tenths of a percent for non-users.

MORE

In the past year, the sharpest increase came in junior high marijuana use (grades 6-8) which rose from 9.5% annual use in 1994-95 to 13.6% in 1995-96, a 43% increase. Nearly a tenth of the junior high (8.1%) said they used marijuana on a monthly basis or more, up from 5.7% in the previous year.

Among high school students (grades 9-12), marijuana annual use climbed from 28.2% to 34%, a 20.6% increase. One out of five in high school (22.3%) smoked monthly or more, versus 18.5% the year before.

Use was highest in the senior class with 37.9% smoking marijuana on an annual basis, 24.3% monthly or more, 16.6% weekly or more, and 7.3% daily.

"One stunning consequence of marijuana use is that a fifth of the Class of '96 who smoke marijuana weekly will find it difficult, if not impossible, to pass a pre-employment drug test," Hall said. "And that says nothing about the negative health consequences of this drug use."

One reason for rising marijuana use may be a lack of belief by students that marijuana is harmful to their health. Among sixth graders, 85.5% said marijuana was "very harmful" to their health. But among 12th graders, only 43.6% said the same.

Students also found marijuana easy to obtain, with 73.3% of 12th graders saying it is easy to get.

Cigarette use at nine-year high

Nearly a half of all students in grades 9-12 smoked cigarettes in the past year (48.2%) and a third of them smoked monthly or more often (33.4%). That compares with 36.1% who used annually in 1987-88, a 33.5% increase, and 23.6% who smoked monthly, a 41.5% increase.

Daily smoking in grades 9-12 rose from 12.3% in 1987-88 to 18.4% in 1995-96, a 49.6% increase.

Mixed success in curbing teen violence

The percentage of students who said they carried a gun to school last year dropped slightly (from 4.9% the year before to 4.5%) as did the percentage saying they joined a gang (from 13.8% to 12.4%).

However, the number who said they threatened to harm someone rose (from 31.8% to 42.1%) as did the percentage of those who got in trouble with the police (from 24.7% to 25.2%).

MORE

Drug use was more common among students who carried a gun to school, joined a gang, got in trouble with the police, or experienced other negative behaviors. (See attachment.)

Methodology

The study was conducted during the 1995-96 school year and involved 129,560 students from 26 states. The PRIDE Survey represents data from sixth through twelfth grade students conducted between September and June of the school year. Participating schools are sent the PRIDE Questionnaire with explicit instructions for administering the anonymous, self report instrument.

Schools that administer the PRIDE Questionnaire do so voluntarily, or in compliance with a school district or state request.

The PRIDE Survey is consistent with other national studies, including the National Institute on Drug Abuse's Monitoring the Future Survey (see table below).

Information from the PRIDE Survey is found in the President's National Drug Control Strategy and the Bureau of Justice Statistics Sourcebook. It is also used by the United States Congress as an indicator of student drug use.

Results from the 1995-96 PRIDE Survey were announced at a press conference at the National Press Club in Washington. Participating were Thomas J. Gleaton, Ed.D., president of PRIDE, and co-author of the survey, J. Douglas Hall, executive director of PRIDE, and Gen. Barry R. McCaffrey (Ret.), director of the Office of National Drug Control Strategy.

CHAPTER 2

SUMMARY STATISTICS

The following graphs and tables summarize some of the **Student Information** questions in regards to drug use. These data are calculated by examining specific subsets of your population. For example, a percentage is calculated for students who report carrying a gun and their liquor use. This percentage is calculated as follows:

$$\frac{\text{Number of those reporting carrying a gun to school and claiming to use liquor}}{\text{Number of those reporting carrying a gun and validly responding to the question } \textit{How Often Do You Use Liquor}}$$

The **Ratio** describes the relationship between the groups examined on each graph. For example, in looking at Guns vs No Guns if the cocaine ratio were 5.3 this would mean the percentage of students who report cocaine use was 5.3 times higher for students who report bringing a gun to school compared to those who don't.

2.7. Risk and Protective Factors

A *risk factor* is any characteristic which researchers have linked to a higher incidence of drug use. A *protective factor* is any characteristic which has been linked to a lower incidence of drug use. The following analysis of local risk and protective factors does not consider any cause and effect, only a *relationship* between student characteristics and drug use. Community, School, Family and Individual risk and protective factors are grouped accordingly and discussed.

2.7.1. Community - Risk Factors

FACTOR	% AT RISK
Join in community activities (*Never/Seldom*)	53.1%

CHAPTER 3

STANDARD GRAPHICS

The following graphs will assist you in understanding the relationship of student behavior to alcohol and other drug usage. You are encouraged to make overheads or slides from the graphs for presentations to school faculty, parents, media, and other audiences in the community.

The *Location* and *Time* of drug use graphs will be helpful in understanding the need for a commitment to drug abuse prevention by parents and the larger community - not just by schools. Student alcohol and other drug use occurs most often outside the school and at times when school is not in session.

The *Perceived Harm* of alcohol and other drugs will assist with understanding how the false assumptions concerning harm are related to drug use. When drugs are perceived as harmless, the probability of use increases.

Research indicates that easy access, *Availability,* to drug increases the probability of use. Availability of alcohol and other drugs normally increases at higher grade levels.

PERCENTAGE TABLES

This chapter contains your school survey results in tabular form. Each table corresponds to an item on the questionnaire. The tables contain percentage data by grade level, *Junior High* (grades 6 through 8), *Senior High* (grades 9 through 12), and *Total*. The *N of Valid* column contains the number of students responding to the item and the *N of Missing* column contains the number of students not responding to the item. The remaining columns contain the percentages of students responding to the particular response categories.

The percentage tables of the report appear in the same order as corresponding questions on the questionnaire. The Table of Contents contains the percentage tables by section and gives the page number where each section is located. The List of Tables contains the location of each individual table.

The last section of tables presents the frequency of drug use *How Often Do You Use* data with the categories *collapsed* as follows:

Daily Use	—	Every Day
Weekly Use	—	Once/Week + 3 Times/Week + Every Day
Monthly Use	—	Once/Month + Twice Month + Once/Week + 3 Times/Week + Every Day
Annual Use	—	Once/Year + 6 Times/Year + Once/Month + Twice Month + Once/Week + 3 Times/Week + Every Day

Two additional drug use categories have been created for the question *How Often Do You Use* by combining the existing data. An *Alcohol Use* category was created by looking at the responses on each questionnaire on the alcohol categories and taking the highest value as the value for *Alcohol Use*. The category of *Illicit Drug Use* was created in the same way by looking at the illicit drug categories. Therefore, the *Alcohol Use* category represents any alcohol use regardless of the type of alcohol and the *Illicit Drug Use* category represents any illicit drug use regardless of the type of drug.
